2 MR. TARAS: Robert Taras, T-A-R-A-S.
3 I'm concerned that the trace of the money
4 that has been supporting this project and the money
5 that will come out of this project once nuclear waste
6 is being transported here has not really been made
7 available to the public in economic impact of the
8 route, as well as the cities along the route, because I
9 believe that big money in terms of big corporations and
10 big organizations are funding this project to go
11 through against the will of the common people, little
12 people, public, along the route, as well as in the
13 cities that are affected during this. So I would like
14 these, the economic impact of this to be more
15 investigated before the Yucca Mountain site is
16 designated for approval. Thank you.
